You can use Drive for desktop to keep your files in sync between the cloud and your computer. Syncing is the process of downloading files from the cloud and uploading files from your computer's hard drive. After syncing, the files on your computer match the files in the cloud. If you edit, delete, or move a file in one location, the same change happens in the other location. That way, your files are always up to date and can be accessed from any device. On this page Install and open Drive for desktop Open files on your desktop Set up sync Install and open Drive for desktop To download Drive for desktop: DOWNLOAD FOR WINDOWS DOWNLOAD FOR MAC On your computer, open: GoogleDriveSetup.exe on Windows GoogleDrive.dmg on Mac Follow the on-screen instructions. Tip: You might not be able to use Drive for desktop, or your organization might install it for you. If you have questions, ask your administrator. To open Drive for desktop: You can find Drive for desktop Menu in a different place, depending on what computer you use: Windows: At the bottom right of your screen. Mac: At the top right of your screen. Open files on your desktop When you install Drive for desktop on your computer, it creates a drive in My Computer or a location in Finder named Google Drive. All of your Drive files appear here. Any new files or folders you create in Drive or Drive for desktop sync and appear on all your devices. Click Drive for desktop click your nameOpen Google Drive . In My Drive or Shared drives, double-click the file that you want to open. Files created by Google Docs, Sheets, Slides, or Forms open in your browser. Other files open in their regular applications on your computer. Set up sync You can manage how much local storage you use and where your content is located by configuring Drive to stream or mirror your files and folders. For information on how to set up and control bulbs or plugs from other manufacturers or a Cync (C by GE) smart switch, check our smart device control page and smart device setup page. Google Nest allows you to turn your Cync (C by GE) devices on and off and control bulb brightness remotely with voice commands, the Google Home app, or a visual display like the Google Nest Hub. All Cync (C by GE) plugs and bulbs, including Soft White and Tunable White bulbs, can be paired with your Google Nest or Home speaker or display. You can connect up to 6 Cync (C by GE) bulbs and plugs with each speaker or display. Set up your Cync (C by GE) devices Note: If your Cync (C by GE) device doesn't appear during Seamless setup, set up your device in the Cync (C by GE) app first. Then, follow the steps to connect other smart devices in the Google Home app. If your Cync (C by GE) devices aren't set up in the Cync (C by GE) app, you can set them up in the Google Home app. Plug in your device in the same room as your speaker or display. Set up your speaker or display if you haven't already. Open the Google Home app . Tap Devices Add Works with Google Home . Follow the in-app instructions to complete setup. Tip: The name you give your device is used for voice commands. Use a name like "reading light" or "overhead light." Don't include the name of the room when you name the device. Note: The device may blink during its first firmware update after you set it up with the Google Home app. To move devices from the Cync (C by GE) app, delete them from the Cync (C by GE) app and set them up in the Google Home app. Turn on your Cync (C by GE) device. The device must be turned on before you continue. Delete the device from the Cync (C by GE) app. This action also factory resets the device. If the factory reset is successful, the bulb you're about to set up should blink 3 times or the plug light should blink blue. If the bulb or plug light doesn't blink, it means you need to factory reset each bulb or plug manually. Note that the reset sequence is different depending on your device's firmware version. If the first reset sequence doesn't work, it means you have an older firmware version and will need to use the second reset sequence. Open the Google Home app . Tap Devices Add Works with Google Home . Choose a home to set up the device in and tap Next. The Home app should start to scan for nearby devices that are ready for setup. Select the bulb or plug you'd like to set up. Your device blinks when selected. Room selection: Choose which room your device is in. To create a custom room, tap Add custom room type in room name tap Next. Name your device: Type in the name that you want to use for voice commands. It's recommended to use a contextual name like "reading light" or "coffee maker plug." For best results, don't include the room name in the device's name. Your device may receive an update and blink a few times. Tap Got it. Your devices are ready. Tap Continue. Setup is successful. You're all done! Note: The device may blink during its first firmware update after you set it up with the Google Home app. To do this: Say "Hey Google" or "Ok Google," then: To turn on or off a particular light (Example: "desk light") "Turn off the desk light" Dim lights "Dim the desk light" or "Dim all the lights" Brighten lights "Brighten the desk light" Set a light brightness to a certain percentage "Set desk light to 50%" or "Set lights to 70%" Dim or brighten lights by a certain percentage "Dim lamp by 50%" or "Brighten lights by 10%" Turn on or off all lights "Turn on all of the lights" or "Turn off all of the lights" Set Tunable White bulbs to Vibrant or wake color "Set lights to bright white" Set Tunable White bulbs to Active or everyday color "Set lights to soft white" Set Tunable White bulbs to Calm or sleep color "Set lights to candlelight" Change the color temperature of Tunable White bulbs "Change lights to 2700 kelvin" (2000-7000 range) To do this: Say "Hey Google" or "Ok Google," then: To turn on or off a particular plug (Example: "desk plug") "Turn off the desk plug" Turn on or off all plugs "Turn on all of the plugs" or "Turn off all of the plugs" Note: When your speaker or display and Cync (C by GE) devices are in the same room, your speaker or display should know your voice commands are for the Cync (C by GE) devices in that room. For example, if your speaker and bulbs are in the living room, and you say "Hey Google, turn off the lights," then the living room lights should turn off. Control your lights and plugs with the Google Home app To find the control screen for your device, open the Google Home app tap your device. You can turn your device on and off or change the Tunable White bulb color temperature. Set a schedule for your lights and plugs You can use Routines to set a schedule for your device. Open the Google Home app Tap Automations . Tap Add or a ready-made Routine. Note: You need to enter a voice command for your Routine. The Routine should still start automatically at the time you schedule. Open the Google Home app . Tap Favorites or Devices . Touch and hold your device's tile. At the top right, tap Settings Name. Enter a name tap Save. Tip: The name you give your device will be used for voice commands. Use a name like "reading light" or "overhead light." Don't include the name of the room when you name the device. Note: You can't unlink individual Cync (C by GE) lights or plugs. When you remove one Cync (C by GE) device through these steps, it removes all Cync (C by GE) devices: Make sure your bulbs or plugs are powered on. Open the Google Home app . Tap Favorites or Devices . Touch and hold your Cync (C by GE) device's tile. Tap Settings Remove device Remove. When you remove one device, it removes all your Cync (C by GE) bulbs and plugs. The option to remove individual Cync (C by GE) lights and plugs is not supported. Make sure the outlet receives power. Check that your wall switch is on. Turn the bulb or plug off and on. The device takes up to one minute after it receives power to reconnect to your speaker or display. Try your light or plug and check if it works. If so, you're done. Try to use the device in a different lamp or socket. Follow the steps to set up smart home devices. Cync (C by GE) switches use different setup steps than bulbs or plugs. After you open the Google Home app : Tap Devices Add Works with Google Home . New to smart lights? The Smart Light Starter Kit is your first step to home automation with a Google Nest Mini (2nd gen) or a Google Home Mini (1st gen), and a GE Soft White Smart Bulb in one package.
