Show original Show translation MTM Black Target Stand, JM40List: \$42.19 (Save \$2.55) The Eliminator III LaserScope is a highly innovative and effective hunting riflescope that stands out as one of the best in the world. With exceptional optics, precise laser rangefinding, and trajectory compensation that matches your chosen ammunition, this scope eliminates the guesswork that often leads to unsuccessful hunts. With just one quick action, the Eliminator III calculates the distance to your target, factors in the trajectory, and displays the perfect holdover for an accurate shot. This riflescope is a game-changer for hunters who want to extend the range and accuracy of their rifle. No other scope on the market offers the same level of quality, technology, accuracy, repeatability, speed, and efficiency. With the Eliminator III, you'll be able to take ethical shots at much greater distances than before. Features & Benefits of the Burris Eliminator III LaserScope: Built-In Laser Rangefinder Laser range capability out to 1,200-plus yards with the reflective target, 750-plus yards with the non-reflective target. Allows you to range your target without Carrying additional equipment. New model with remote cable switch makes ranging activation even easier. Automated Trajectory Compensation Customized trajectory compensation calculates the perfect holdover at your precise distance; program your cartridges ballistics info, push a button and also a bright-red, lit dot signifies your new aiming point. Trajectory compensation works on almost any magnification. Integrated inclinometer Integrated inclinometer adjusts for almost any angle on uphill or down-hill shots. Wind Hold-Off Scope displays a 10 mph Wind Value to indicate end hold-off for your Particular cartridge at the range that is suggested to target. Wind Value represents how many dots to hold onto the end to get a 10 mph crosswind. Strong, Low Mounting Riflescope comes along with its own bases that attach to some Weaver-style or Picatinny base. No rings required. Easy Programming The Eliminator III comes along with a programming book, and there's a website application to help get the exact programming numbers you need, based on your elevation, atmospheric condition, and cartridge selection. The Burris Eliminator III 4-16x50 Rangefinding Rifle Scope is a popular choice among hunters and shooters who want to take their accuracy to the next level. This scope combines advanced optics with a built-in laser rangefinder, allowing you to accurately calculate the distance to your target and adjust your shot accordingly. The scope has a magnification range of 4-16x, which is suitable for both short and long-range shooting. The 50mm objective lens allows for a clear and bright image even in low light conditions, making it ideal for hunting during dawn and dusk. One of the most notable features of this scope is the built-in laser rangefinder, which can measure distances up to 1,200 yards. The rangefinder is activated with a button on the side of the scope, and the distance is displayed in the reticle, making it easy to quickly adjust your shot. Another useful feature is the scope's trajectory compensation system, which allows you to select from a variety of bullet drop compensation points based on the caliber and load of your rifle. Once you've selected the appropriate point, the reticle will display the exact holdover needed to make an accurate shot. The scope also has a parallax adjustment feature, which allows you to adjust for parallax at any distance, ensuring a clear and accurate image. The scope is also waterproof, fog proof, and shockproof, making it durable and reliable in a variety of weather conditions. In terms of drawbacks, the Burris Eliminator III is a bit heavy, weighing in at 26 ounces. It's also quite expensive, which may not be ideal for those on a tight budget. Overall, the Burris Eliminator III 4-16x50 Rangefinding Rifle Scope is a top-of-the-line option for hunters and shooters who want the best possible accuracy and performance. With its advanced optics and built-in rangefinder, this scope is a game-changer for anyone looking to improve their shooting skills. However, it may not be suitable for those who are looking for a more affordable or lightweight option. Burris Quick Links: Relate AR15 Scope Quick Links The Burris Eliminator III 4x-16x-50mm is a lightweight riflescope with an integrated laser rangefinder and point of aim correction designed right in the reticle. With this scope, you can simply point at the target, push the button, and see the point of aim show up with an aiming dot - already adjusted for distance, and for your specific ammunition. Accurate at 1,200+ yards and at any magnification, the Eliminator will revolutionize your hunting or shooting experience.FeaturesBuilt-in rangefinder allows you to range target without carrying additional equipmentTrajectory compensation is determined with the push of a button, accurately and precisely for your exact ammunition and rangeReady for ranging and determining point of aim on targets out to 1,200+ yardsIntegrated inclinometer automatically corrects for angular distance correctionsIlluminated aiming point can be used even in low-light conditionsTrajectory compensation works on any magnification settingProgramming scope as easy as programming an alarm clockComes with programming book, and reference to website with application to assist in getting the programming numbers you need based on elevation, atmospheric condition, and cartridgeRanging value available in yards or metersReticle displays a 10mph wind value to indicate wind hold-off for specific cartridge at specific rangeRobust, low mount included with base - no rings neededMounts easily on any Weaver or Picatinny railHigh-grade optical glass for a robust, durable, and optically brilliant shooting experienceHi-Lume multicoating assists with low-light performance and reduction of glareGuaranteed by the Burris Forever Warranty BURRIS Eliminator III 4-16x50 Unboxing - Awesome scope!Life Boost To view this video download Flash Player
