1. Upload a document from your computer or cloud storage. 2. Add text, images, drawings, shapes, and more. 3. Sign your document online in a few clicks. 4. Send, export, fax, download, or print out your document. Editing documents is no longer tedious with DocHub's editing solution. You can modify contracts, invoices, and other documents easily by adjusting the file to suit your needs. The solution supports multiple formats such as PDF, DOCX, DOC, XLS, XLSX, PPT, RTF, and TXT. Instant Document Sharing and Storage Securely share documents via email, fax, or by setting a password-protected folder with recipient authentication. Edit and Sign PDFs Directly from Google Apps Upload your document to the cloud and instantly convert it into an editable format. Access, edit, sign, and share files straight from your favorite apps. Editing and Converting PDFs Made Easy Use s online editor or EaseUS to make any PDF document editable in minutes. Select the Text button, type, and add signatures or pictures as needed. Scanning PDFs into Editable Formats Upload a scanned PDF using s uploader or Xodos online PDF to Text converter with OCR. Convert your file to a searchable and editable format. Converting PDFs to Word Documents Upload your PDF to Google Drive, convert it to a DOCX file, and make changes as needed. PDF Editing Options at Your Fingertips Use EaseUS, a free PDF editor that offers options for reading, creating, editing, and converting files in various formats. DocHub offers an affordable and customizable solution for small businesses, allowing secure document sharing with clients via email or real-time viewing and editing. Users can create refillable templates, publish them, and work efficiently with PDF files, which they find professional and versatile. The process involves scanning documents, using OCR software to extract text, and converting the output into an editable format like Microsoft Word. Several online tools, such as New OCR and Online OCR, provide free OCR services without watermarking or sign-up requirements. If you have the Word version of a document installed on your computer, you can grab a .txt copy by clicking on Plain text (TXT) in the drop-down menu after downloading it. Then, use Notepad (for Windows) or TextEdit (for Mac) to make any necessary edits. 9 You can also edit the PDF's Word version directly. Double-click the downloaded Word document to open it in Microsoft Word, and then you should be able to tweak any readable text. Some parts might still be off-limits due to translation hiccups. Before editing, ensure that you click Enable Editing at the top of the Word window if needed. 10 To save your changes as a PDF, follow these steps:[1] For Windows: Click File, then Save As, and in the drop-down box, pick PDF; finally, hit Save. On Mac, click File, Save As, enter a name, choose PDF from the Format box, and press Save. 1. Once the file is converted by Online OCR, click on its name at the bottom of the page. 2. To download the document, click the blue link with your document's name. 3. Double-click the downloaded Word document to open it in Microsoft Word. 4. Edit readable text in the PDF within the Word document. 5. Some text might be uneditable due to translation errors; enable editing if needed. 6. Save the edited Word document as a new PDF file.
